

Basel 3 Pillar 3

Disclosure as at 31 March 2022

This is an English translation of the original Italian document "Terzo Pilastro di Basilea 3 Informativa al pubblico al 31 marzo 2022". In cases of conflict between the English language document and the Italian document, the interpretation of the Italian language document prevails. The Italian original is available on group.intesasanpaolo.com.

This document contains certain forward-looking statements, projections, objectives, estimates and forecasts reflecting the Intesa Sanpaolo management's current views with respect to certain future events. Forward-looking statements, projections, objectives, estimates and forecasts are generally identifiable by the use of the words "may," "will," "should," "plan," "expect," "anticipate," "estimate," "believe," "intend," "project," "goal" or "target" or the negative of these words or other variations on these words or comparable terminology. These forward-looking statements include, but are not limited to, all statements other than statements of historical facts, including, without limitation, those regarding Intesa Sanpaolo's future financial position and results of operations, strategy, plans, objectives, goals and targets and future developments in the markets where Intesa Sanpaolo participates or is seeking to participate.

Due to such uncertainties and risks, readers are cautioned not to place undue reliance on such forward-looking statements as a prediction of actual results. The Intesa Sanpaolo Group's ability to achieve its projected objectives or results is dependent on many factors which are outside management's control. Actual results may differ materially from (and be more negative than) those projected or implied in the forward-looking statements. Such forward-looking information involves risks and uncertainties that could significantly affect expected results and is based on certain key assumptions.

All forward-looking statements included herein are based on information available to Intesa Sanpaolo as of the date of approval of this document. Intesa Sanpaolo undertakes no obligation to update publicly or revise any forward-looking statement, whether as a result of new information, future events or otherwise, except as may be required by applicable law. All subsequent written and oral forward-looking statements attributable to Intesa Sanpaolo or persons acting on its behalf are expressly qualified in their entirety by these cautionary statements.

Introduction

Notes to the Basel 3 Pillar 3 disclosure

With effect from 1 January 2014, the reforms of the accord by the Basel Committee ("Basel 3") were implemented in the EU legal framework. Their aim is to improve the banking sector's ability to absorb shocks arising from financial and economic stress, whatever the source, improve risk management and governance, and increase banks' transparency and disclosures. In doing so, the Committee maintained the approach founded on three Pillars, underlying the previous capital accord, known as "Basel 2", supplementing and strengthening it to increase the quantity and quality of intermediaries' available capital as well as introducing counter-cyclical regulatory instruments, provisions on liquidity risk management and financial leverage containment.

In particular, with the aim of better regulating the market, Pillar 3 identifies a set of public disclosure obligations on capital adequacy, the composition of regulatory capital, the methods used by banks to calculate their capital ratios, and on risk exposure and the general characteristics of related management and control systems.

That said, the content of "Basel 3" was incorporated into two EU legislative acts:

- Regulation (EU) 575/2013 of 26 June 2013 (Capital Requirements Regulation - CRR), as amended, applicable from 1 January 2014, which governs the prudential supervision requirements of Pillar 1 and public disclosure requirements (Pillar 3);
- Directive 2013/36/EU of 26 June 2013 (CRD IV, Capital Requirement Directive) as amended, which, among other things, deals with the access to the activity of credit institutions, freedom of establishment, freedom to provide services, supervisory review process, and additional equity reserves.

On 7 June 2019, following the publication in the Official Journal of the European Union of Regulation (EU) 2019/876 (CRR II), which was part of the broader package of regulatory reforms, also referred to as the Risk Reduction Measures (RRM), which also include the CRD V (Capital Requirements Directive), the BRRD II (Banking Recovery and Resolution Directive) and the SRMR II (Single Resolution Mechanism Regulation), significant changes were introduced to the EU framework established by the two above-mentioned regulations.

EU legislation is complemented by the provisions issued by the Bank of Italy, in particular with Circular 285 of 17 December 2013, as subsequently amended, which contains the prudential supervision regulations applicable to Italian banks and banking groups, reviewed and updated to adjust the internal regulations to the new elements of the international regulatory framework, with special reference to the new regulatory and institutional structure of banking supervision of the European Union and taking into account the needs detected while supervising banks and other intermediaries.

The public disclosure by institutions (Pillar 3) is therefore directly governed by:

- CRR, Part Eight "Disclosure by Institutions" (Articles 431-455), as amended by Regulation (EU) 2019/876 (CRR II), applicable from 28 June 2021;
- the Regulations of the European Commission that transpose the regulatory or implementing technical standards drawn up by the EBA. Of particular importance in this respect is Regulation (EU) 2021/637 of 15 March 2021, applicable from 28 June 2021, discussed further below;
- the Guidelines issued by the EBA – in line with the mandate entrusted to it by Regulation (EU) 1093/2010, which created it – for the purpose of establishing uniform templates for the publication of various types of information.

In line with the regulatory changes introduced by CRR II, the above-mentioned Implementing Regulation (EU) 2021/637, stemming from the mandate given to the EBA by Article 434a CRR II ("Uniform disclosure formats"), was published on 21 April 2021, with the aim of streamlining and harmonising the periodic disclosures to the market by providing institutions with a complete integrated set of formats, templates and tables for uniform disclosures (the single framework), able to ensure high quality disclosure and a consistent framework aligned to international standards. This Regulation, applicable from 28 June 2021, establishes implementing technical standards with regard to public disclosure by institutions of the information referred to in Titles II and III of Part Eight of CRR and repeals Implementing Regulation (EU) 1423/2013 on the disclosure of own funds requirements, Regulation (EU) 2015/1555 on the disclosure of the countercyclical buffer, Implementing regulation (EU) 2016/200 on the disclosure of the leverage ratio, and Delegated Regulation (EU) 2017/2295 on the disclosure of encumbered and unencumbered assets.

In addition, to facilitate the application of the disclosure requirements by institutions and strengthen their consistency and comparability, the EBA also has made a mapping tool available to institutions, consisting of a file that links most of the quantitative public disclosure templates with those in the prudential supervisory reports.

From the reporting date of 30 June 2021, the Intesa Sanpaolo Group publishes disclosures on the basis of the provisions contained in the above-mentioned Regulation.

In addition, the requirement established by Article 448 CRR II (paragraph 1, points a) and b)), relating to the disclosure of exposures to interest rate risk on positions not held in the trading book (IRRBB – Interest Rate Risk in the Banking Book) has also been applicable from June 2021. The forms and instructions to fulfil those obligations of disclosure to the public are set out in Implementing Regulation (EU) 2022/631 of the Commission of 13 April 2022, which - in endorsing the implementing technical standards (ITS) drawn up by the EBA, and in compliance with which the Intesa Sanpaolo Group, starting from the reporting date of 30 June 2021, publishes that detailed disclosure - amends Implementing Regulation (EU) 2021/637.

With regard to the Pillar 3 instructions provided by the EBA through the Guidelines, the reference standards are:

- EBA/GL/2014/14 on materiality, proprietary and confidentiality and on disclosure frequency under Articles 432(1), 432(2) and 433 CRR;
- EBA/GL/2018/01 regarding the templates for the publication of information relating to the impacts on own funds resulting from the introduction of the Regulation (EU) 2017/2395, containing “Transitional arrangements for mitigating the impact of the introduction of IFRS 9 on own funds”. As the Intesa Sanpaolo Group opted for the transitional arrangement through the “static” approach to mitigate this impact, it is also required to provide market disclosure on the amounts of its fully loaded own funds, Common Equity Tier 1 Capital, Tier 1 Capital, CET1 ratio, Tier 1 ratio, Total ratio and Leverage ratio, as if it had not adopted this transitional arrangement. As explained below in this introduction, these guidelines were amended by the Guidelines EBA/GL/2020/12, cited below, as part of the measures introduced as a result of the COVID-19 pandemic.

As part of the context linked to the COVID-19 pandemic, in order to mitigate the possible negative effects generated by the COVID-19 pandemic and ensure disclosure regarding the areas affected by the containment measures adopted for that purpose, thereby promoting sufficient and suitable understanding of the risk profile of supervised institutions, on 2 June 2020, the EBA published the final version of the document “*Guidelines on reporting and disclosure of exposures subject to measures applied in response to the COVID-19 crisis*” (EBA/GL/2020/07), which contains the guidelines for reporting and disclosure of exposures subject to the measures applied in response to the COVID-19 crisis, whose first-time application, for disclosure purposes, started on 30 June 2020.

From that date, therefore, the three templates required by the above-mentioned Guidelines have been added to the Intesa Sanpaolo Group's public disclosure – “Credit risk: credit quality” Section.

Also within the emergency scenario mentioned above, Regulation (EU) 2020/873 of 24 June 2020, amending Regulations (EU) 575/2013 and Regulation (EU) 2019/876 containing temporary support provisions in terms of capital and liquidity, was published with an accelerated approval procedure (the “quick-fix”).

The Regulation establishes that institutions that decide to apply the provisions of the new transitional IFRS 9 rules relating to adjustments to loans after 31 December 2019, amending the rules introduced by Regulation (EU) 2017/2395, and/or the temporary treatment of unrealised gains and losses measured at fair value through other comprehensive income in view of the COVID-19 pandemic (the prudential filter for exposures to central governments classified as FVOCI), in addition to disclosing the information required in Part Eight of the CRR, they are required to disclose the amounts of own funds, Common Equity Tier 1 capital and Tier 1 capital, the total capital ratio, the Common Equity Tier 1 capital ratio, the Tier 1 capital ratio, and the leverage ratio they would have in case they did not apply that treatment.

To complete the regulatory framework developed for the pandemic crisis, following the adoption of the CRR ‘quick-fix’, the EBA clarified the disclosure requirements for temporary treatments introduced with the quick-fix (“Guidelines amending Guidelines EBA/GL/2018/01 on uniform disclosures under Article 473a of Regulation (EU) No 575/2013 (CRR) on the transitional period for mitigating the impact of the introduction of IFRS 9 on own funds to ensure compliance with the CRR ‘quick-fix’ in response to the COVID-19 pandemic” - EBA/GL/2020/12).

With regard to the various provisions set out in Regulation (EU) 2020/873, the Intesa Sanpaolo Group does not make use either of the changes to the transitional regime for the application of IFRS 9 (Article 473a CRR) or the FVOCI prudential filter (Article 468 CRR) for the purpose of calculating own funds, in line with the approach adopted starting from 30 June 2020.

With regard to the growing importance that the monitoring of social, environmental and governance risks (ESG risks) is assuming in the European regulatory framework, it is worth noting the publication by the EBA in January 2022 of the final version of the implementing technical standards (ITS) on Pillar 3 disclosure requirements for these risks, developed in accordance with the mandate given to the EBA by Article 449a CRR and intended for large institutions that have issued securities traded on a regulated market in any Member State. Based on the current proposal, those provisions shall enter into force on 28 June 2022 and the banks shall provide initial disclosure in December 2022 and then every six months, gradually applying the disclosure obligations (phase-in period from December 2022 to June 2024).

As concerns the impacts for the Intesa Sanpaolo Group of the military conflict between Russia and Ukraine and the impacts of the scenario resulting from the COVID-19 pandemic, refer to that described in the Interim Statement as at 31 March 2022 and the 2021 Annual Report of the Group.

* * * * *

In accordance with the above provisions and in line with the approach described above, this document has been prepared on a consolidated basis with reference to a prudential scope of consolidation, essentially corresponding to the definition of Banking Group for Regulatory purposes (supplemented by the proportional consolidation of the jointly controlled entities).

Regarding the scope of accounting consolidation, compared to 31 December 2021, there were no significant changes in the scope of line-by-line consolidation. For the purpose of completeness, we note the entry of:

- Newco TPA S.p.A., a newly-incorporated company in the Insurance Group, 100%-owned by ISP Vita;
- VUB Operating Leasing a.s., previously consolidated using the equity method;

and the exit of:

- Intesa Sanpaolo Private Bank (Suisse) Morval, merged by incorporation into Reyl & Cie;
- VUB Leasing a.s., disposed of as it was demerged into the parent company Vseobecna Uverova Banka a.s. (VUB) for financial operations and into the above-mentioned dedicated company VUB Operating Leasing for the development of operating leases.

Equivalent to that set out regarding the scope of accounting consolidation, there were no significant changes in the prudential scope of consolidation. The immaterial changes listed above impact the prudential scope of consolidation in the same manner, except for Newco TPA S.p.A., which is excluded, as it is an insurance company.

In line with the related supervisory reports, the comparative data for the previous periods were not restated to take account of the changes in the scope of consolidation.

In accordance with Article 433 of the CRR II, banks publish the Pillar 3 disclosures required by European regulations at the same time as the financial statements or as soon as possible after that date. The frequency of publication of disclosures by large institutions (the category the Intesa Sanpaolo Group belongs to) is specifically regulated by Article 433a CRR II (“Disclosures by large institutions”).

In relation to the scope of application of the provisions of the CRR, which refers - as previously indicated - to a prudential consolidation scope, and the provisions of the CRR, this document does not illustrate all the types of risk that the Intesa Sanpaolo Group is exposed to. For more details, see the Group’s Interim Statement as at 31 March 2022 and 2021 Annual Report.

All the amounts reported in this disclosure, unless otherwise specified, are stated in millions of euro.

The preparation of the Pillar 3 disclosure on capital adequacy, risk exposure and the general characteristics of the related management and control systems of Intesa Sanpaolo is governed, in compliance with the applicable regulations, by the “Guidelines on the disclosure of Financial information to the Market”, approved by the Board of Directors. The governance of the Pillar 3 disclosure requires the Chief Risk Officer to ensure that the risk information provided therein complies with the prudential regulation and is consistent with Group risk management guidelines and policies and with the measurement and control of the Group’s exposure to the different risk categories.

As a public disclosure, the document is accompanied by the declaration of the Manager responsible for preparing the Company’s financial reports, pursuant to paragraph 2 of Art. 154-bis of the Consolidated Law on Finance, which confirms that the accounting information contained in the document corresponds to the supporting documentation, ledgers and other accounting records.

The preparation of Financial disclosures to the Market is one of the processes subject to assessment under the Group “Administrative and Financial Governance Guidelines”, which were also approved by the Board of Directors.

Lastly, as required by the G-SIBs assessment exercise conducted by the EBA, the Group’s website publishes information, upon the required deadlines, on the value of the indicators of global systemic importance (Governance\Risk management Section of the website: “Indicators of the assessment methodology to identify the global systemically important banks”).

Own funds

Qualitative and quantitative disclosure

Introduction

As previously mentioned, the harmonised rules for banks and investment companies contained in Directive 2013/36/EU (CRD IV) and in Regulation (EU) 575/2013 (CRR) of 26 June 2013 and amended respectively by Directive 2019/878/EU (CRD V) and Regulation (EU) 2019/876 (CRR II), which transpose the banking supervision standards defined by the Basel Committee (the Basel 3 Framework) into European Union laws, became applicable from 1 January 2014.

The above provisions have been incorporated into the following two regulations:

- Bank of Italy Circular 285: “Supervisory regulations for banks” which renders the above-mentioned provisions operational;
- Commission Implementing Regulation (EU) 2021/451 of 17 December 2020 laying down implementing technical standards for the application of Regulation (EU) 575/2013 with regard to supervisory reporting of institutions and repealing Commission Implementing Regulation (EU) 680/2014.

These provisions are supplemented by the European Commission Delegated Regulations and the ECB Decisions on the definition of Own Funds, listed below:

- Commission Delegated Regulation (EU) 342/2014 of 21 January 2014, supplementing Directive 2002/87/EC of the European Parliament and of the Council and Regulation (EU) 575/2013 of the European Parliament and of the Council with regard to regulatory technical standards for the application of the calculation methods of capital adequacy requirements for financial conglomerates;
- Commission Delegated Regulation (EU) 2015/923 of 11 March 2015, amending Delegated Regulation (EU) 241/2014 supplementing Regulation (EU) 575/2013 of the European Parliament and of the Council with regard to regulatory technical standards for Own Funds requirements for institutions;
- Commission Delegated Regulation (EU) 2016/101 of 26 October 2015 supplementing Regulation (EU) 575/2013 of the European Parliament and of the Council with regard to regulatory technical standards for prudent valuation;
- Decision No. 2015/656 of the European Central Bank of 4 February 2015 on the conditions under which credit institutions are permitted to include interim or year-end profits in Common Equity Tier 1 capital;
- Regulation (EU) 2017/2395 of the European Parliament and of the Council of 12 December 2017, amending Regulation (EU) 575/2013, through the addition of the new Article 473a (“Introduction of IFRS 9”), in relation to the transitional arrangements for mitigating the impact of the introduction of IFRS 9 on own funds and for the large exposures treatment of certain public sector exposures denominated in the domestic currency of any Member State. The above article was amended in turn by Regulation (EU) 2020/873 of 24 June 2020 (so-called “CRR quick fix”), which makes adjustments in response to the COVID-19 pandemic;
- Regulation (EU) 2019/630 of the European Parliament and of the Council of 17 April 2019 amending Regulation (EU) 575/2013 as regards minimum loss coverage for non-performing exposures;
- Commission Delegated Regulation (EU) 2020/2176 of 12 November 2020 amending Commission Delegated Regulation (EU) 241/2014 as regards the deduction of software assets from Common Equity Tier 1 items.

This regulatory framework requires that Own Funds (or regulatory capital) are made up of the following tiers of capital:

- Tier 1 Capital, in turn composed of:
 - Common Equity Tier 1 Capital (CET1);
 - Additional Tier 1 Capital (AT1);
- Tier 2 Capital (T2).

Tier 1’s predominant element is Common Equity, mainly composed of equity instruments (e.g. ordinary shares net of treasury shares), share premium reserves, retained earnings reserves, undistributed income for the period, valuation reserves, eligible minority interests, net of the deducted items.

In order to be eligible for Common Equity, the equity instruments issued must guarantee absorption of losses on going concern, by satisfying the following characteristics:

- maximum level of subordination;
- option for suspending the payment of dividends/coupons at the full discretion of the issuer and in a non-cumulative manner;
- unredeemability;
- absence of redemption incentives.

At present, with reference to the Intesa Sanpaolo Group, no equity instrument other than ordinary shares is eligible for inclusion in Common Equity.

A number of prudential filters are also envisaged with effects on Common Equity:

- filter on profits associated with future margins deriving from securitisations;
- filter on cash flow hedge (CFH) reserves;

- filter on profits or losses on liabilities designated at fair value (derivatives or otherwise) associated with changes in own credit risk (DVA);
- adjustments to fair value assets associated with the “prudent valuation”.

The regulation also envisages a series of elements to be deducted from Common Equity Tier 1:

- losses for the current year;
- goodwill, intangible assets and residual intangible assets;
- deferred tax assets (DTA) associated with future income not deriving from temporary differences (e.g. DTA on losses carried forward);
- expected losses exceeding total credit risk adjustments (the shortfall reserve) for exposures weighted according to IRB approaches;
- net assets deriving from defined benefit plans;
- direct, indirect or synthetic holdings of the entity in Common Equity Tier 1 Capital instruments;
- exposures for which it is decided to opt for deduction rather than a 1,250% weighting among RWA;
- non-significant investments in CET1 instruments issued by companies operating in the financial sector (less the amount exceeding the thresholds envisaged in the regulations);
- deferred tax assets (DTA) that rely on future profitability and arise from temporary differences (deducted for the amount exceeding the thresholds envisaged in the regulation);
- significant investments in CET1 instruments issued by companies operating in the financial sector (deducted for the amount exceeding the thresholds envisaged in the regulation);
- the applicable amount of insufficient coverage for non-performing exposures, as governed by Regulation (EU) 2019/630 (minimum loss coverage);
- any negative difference between the current market value of the units or shares in CIUs held by retail customers and the present value of the minimum amount that the institution has committed as a guarantee for those customers (minimum value commitment).

The AT1 category includes equity instruments other than ordinary shares (which are eligible for Common Equity), which meet the regulatory requirements for inclusion in that level of own funds (e.g. savings shares or AT1 equity instruments), once the deductions of items and exemptions provided for in Regulation (EU) 575/2013 (CRR) and amended by Regulation (EU) 2019/876 (CRR II) have been applied.

Tier 2 Capital is mainly composed of items such as eligible subordinated liabilities and any excess of credit risk adjustments over and above expected losses (the excess reserve) for exposures weighted according to IRB approaches, once the deductions of items and exemptions provided for in Regulation (EU) 575/2013 (CRR) have been applied. Following the issue of Regulation (EU) 2019/876 (CRR II), the eligibility of class 2 instruments with a residual duration of less than five years (being amortised) is determined based on the carrying amount instead of the nominal value.

The transitional period (2018-2022), also aimed at mitigating the capital impacts linked to the introduction of the new financial reporting standard IFRS 9, started from 1 January 2018. The Intesa Sanpaolo Group has exercised the option provided in the above-mentioned EU Regulation 2017/2395 of adopting the “static” approach that allows the neutralisation of a progressively decreasing amount of the impact of IFRS 9 in its CET1 solely for the FTA component of the impairment.

In particular, the result from the comparison between the IAS 39 adjustments at 31 December 2017 and the IFRS 9 adjustments at 1 January 2018 – relating to performing loans and securities (stage 1 and 2) and adjustments to NPLs (stage 3), net of tax and having eliminated any shortfall reserve – is re-included in the capital according to phase-in percentages of 95% in 2018, 85% in 2019, 70% in 2020, 50% in 2021, and 25% in 2022. During the transitional period, the Group may also elect to change this approach once only, subject to authorisation from the Supervisory Authority, moving from the “static” approach to the “dynamic” approach or suspending the application of the transitional treatment in favour of the fully loaded regime. During 2018, two EBA Q&As were published (2018_3784, 2018_4113) which specified that, during the transitional period, any Deferred Tax Assets (DTAs) connected to IFRS 9 FTA-related adjustments should not be considered as deductions from CET1 as envisaged by the CRR.

Considering that the approval of Law 145 of 30 December 2018 (2019 Budget Act) led to the recognition of DTAs linked to the deferred deductibility, over 10 financial years starting from 2018, of the value adjustments recognised in shareholders’ equity because they are related to the first-time adoption of IFRS 9, as envisaged by the aforementioned Regulation and the subsequent EBA Q&As, those DTAs have been neutralised for the purposes of CET 1 Capital during the transitional period established for the IFRS 9 impact (which extends until 2022) limited to the complementary portion of the phase-in percentages detailed above. Law 160 of 27 December 2019 (2020 Budget Act), like the previous Law, deferred the deduction of the portions pertaining to 2019 of the above value adjustments to the tax period 2028.

In November 2019, Q&A 2018_4302 was published which allows the amount of net deferred tax assets that rely on future profitability to be treated for prudential purposes, within the deductions from the CET1 items provided for in the CRR, independently and distinctly from the accounting framework applied to them. In this respect, the EBA clarified that for the deduction of the above-mentioned DTAs from CET1 items, the netting rules established by the CRR apply and that therefore the amount of the DTAs – calculated for prudential purposes – may differ from the related net balance reported in the periodic reports and determined according to the applicable accounting rules.

The above-mentioned Regulation (EU) 2019/876 (CRR II), in Article 494b “Grandfathering of Own Funds instruments and eligible liabilities instruments”, introduced a new transitional regime, applicable until 28 June 2025, which allows Own Funds instruments – issued before 27 June 2019 (the date of entry into force of CRR II), which do not meet the specific conditions set out in points p), q) and r) of Article 52 (“Additional Tier 1 instruments”), as amended by Article 1 point 23) of CRR II, and in points n), o) and p) of Article 63 (“Tier 2 instruments”), as amended by Article 1 point 27) of CRR II – to qualify as AT1 and T2

instruments. Since July 2020, the Intesa Sanpaolo Group has no longer held any subordinated instruments subject to the above-mentioned transitional rules.

In addition, as already mentioned in the introduction to this document, since June 2020 the Intesa Sanpaolo Group has not adopted the new IFRS 9 transitional rules relating to adjustments to loans after 31 December 2019 or the reintroduction of the prudential filter for exposures to central governments classified to the FVOCI category, both introduced by the European Commission in Regulation 2020/873 of 24 June 2020 (quick fix).

Lastly, since December 2020, the Intesa Sanpaolo Group has applied Commission Delegated Regulation (EU) 2020/2176, which entered into force on 23 December 2020 and amends Commission Delegated Regulation (EU) 241/2014 as regards the deduction of software assets from Common Equity Tier 1 items. The Regulation introduced the criterion of prudential amortisation applied to all software assets over a three-year period, regardless of their estimated useful lives for accounting purposes. Specifically, the difference, where positive, between prudential cumulative amortisation and accounting cumulative amortisation (including impairment losses) is fully deducted from CET1. The remainder, i.e. the portion of the net carrying amount of each software asset not deducted as a result of the prudential treatment, is included in the RWAs with a 100% risk weight.

Breakdown of Own Funds

The structure of the Intesa Sanpaolo Group's Own Funds as at 31 March 2022 is summarised in the table below.

	(millions of euro)	
	31.03.2022	31.12.2021
A. Common Equity Tier 1 (CET1) before the application of prudential filters	55,282	55,955
of which CET1 instruments subject to transitional adjustments	-	-
B. CET1 prudential filters (+ / -)	265	492
C. CET1 before items to be deducted and effects of transitional period (A +/- B)	55,547	56,447
D. Items to be deducted from CET1	-10,673	-10,712
E. Transitional period - Impact on CET1 (+/-)	755	1,512
F. Total Common Equity Tier 1 (CET1) (C-D +/-E)	45,629	47,247
G. Additional Tier 1 (AT1) before items to be deducted and effects of transitional period	7,248	6,264
of which AT1 instruments subject to transitional adjustments	-	-
H. Items to be deducted from AT1	-	-
I. Transitional period - Impact on AT1 (+/-)	-	-
L. Total Additional Tier 1 (AT1) (G - H +/- I)	7,248	6,264
M. Total Tier 1 (T1) (F + L)	52,877	53,511
N. Tier 2 (T2) before items to be deducted and effects of transitional period	8,702	9,164
of which T2 instruments subject to transitional adjustments	-	-
O. Items to be deducted from T2	-243	-223
P. Transitional period - Impact on T2 (+ / -)	-	-
Q. Total Tier 2 (T2) (N - O +/- P)	8,459	8,941
R. Total own funds (F + L + Q)	61,336	62,452

The tables below provide a detailed summary of the various capital levels before regulatory adjustments and transitional regime adjustments, together with the reconciliation between Common Equity Tier 1 and net book value.

The own funds disclosure required by the above-mentioned Regulation 2021/637, applicable from June 2021, is provided:

- Attachment 1, which contains details of the terms and conditions of the Additional Tier 1 instruments issued during the first three months of 2022, in line with the new template EU CCA of Regulation 2021/637;
- Attachment 2: template EU CC1 – Composition of regulatory own funds.

The full terms and conditions of all the other Common Equity Tier 1, Additional Tier 1 and Tier 2 instruments have been reported in Attachment 1 to the Basel 3 Pillar 3 - Disclosure as at 31 December 2021.

Reconciliation of net book value and Common Equity Tier 1 Capital

Common Equity Tier 1 capital (CET1) before regulatory adjustments	55,282	55,955
Regulatory adjustments (including transitional adjustments) ^(d)	-9,653	-8,708
Common Equity Tier 1 capital (CET1) net of regulatory adjustments	45,629	47,247

(a) The Shareholders' Equity as per the Balance Sheet does not include the interim dividend paid on 24 November 2021 of 1,399 million euro (net of the amount not distributed in respect of own shares held at the record date, of around 2 million euro).

(b) Common Equity Tier 1 capital as at 31 March 2022 includes the net income as at that date, less the related dividend, calculated taking into account the payout envisaged in the 2022-2025 Business Plan (70% for 2022) and other foreseeable charges (accrued coupon on Additional Tier 1 instruments net of tax).

(c) The amount as at 31 March 2022 primarily includes the dividend and the portion intended for charitable donations relating to 2021 net income, as approved by the Shareholders' Meeting on 29 April 2022.

(d) Adjustments for the transitional period as at 31 March 2022 take account of the prudential filter, which allows re-inclusion in Common Equity of a portion of the impact of IFRS 9 (25% in 2022) set to decrease progressively until 2022.

Total regulatory adjustments to Common Equity Tier 1 (CET1)	-10,408	-10,220
Total adjustments in the transitional period (CET1)	755	1,512
Common Equity Tier 1 (CET1) - Total	45,629	47,247

(a) Amount included in CET1, includes a negative effect of about 3,265 million euro deriving from the adoption of IFRS 9, in addition to the 2021 income allocated to reserves.

(b) The caption "Accumulated other comprehensive income" includes a positive effect of about 328 million euro deriving from the adoption of IFRS 9.

(c) Common Equity Tier 1 capital as at 31 March 2022 includes the net income as at that date, less the related dividend, calculated taking into account the payout envisaged in the 2022-2025 Business Plan (70% for 2022) and other foreseeable charges (accrued coupon on Additional Tier 1 instruments net of tax).

(d) As at 31 December 2021, the figure considers the dividends on 2021 results, the portion of the remuneration of the AT1 instruments issued at that date and the portion of 2021 income allocated to charity, net of the tax effect.

(e) See the specific table for the details of the calculation of the deduction thresholds.

(f) The caption includes also "Foreseeable tax charges relating to CET1 items".

For the purposes of calculating own funds as at 31 March 2022 the net income for the first quarter was considered, less the related dividend, calculated according to the payout ratio envisaged in the 2022-2025 Business Plan (70%) and other foreseeable charges.

As envisaged by Article 36 (1)(k)(ii) of Regulation (EU) 575/2013 which governs this circumstance, in place of the weighting of the positions towards securitisations that meet the requirements to receive a weighting of 1,250%, it was chosen to proceed with the direct deduction of these exposures from the Own Funds.

The amount of such deduction as at 31 March 2022 is equal to -100 million euro.

Deduction thresholds for DTAs and investments in companies operating in the financial sector

	(millions of euro)	
	31.03.2022	31.12.2021
A. Threshold of 10% for CET1 instruments of financial sector entities where the institution does not have a significant investment	4,491	4,576
B. Threshold of 10% for CET1 instruments of financial sector entities where the institution has a significant investment and for DTA that rely on future profitability and arise from temporary differences	4,491	4,576
C. Threshold of 17.65% for significant investments and DTA not deducted in the threshold described under point B	7,147	7,268

The regulations envisage that for certain regulatory adjustments, such as those for DTAs based on future income and deriving from temporary differences, and for significant and minor investments in CET1 instruments issued by companies in the financial sector, certain thresholds or “deductibles” are specified, calculated on Common Equity estimated using different approaches:

- for minor investments in CET1 instruments issued by companies in the financial sector, the deduction of amounts exceeding 10% of CET1 prior to deductions deriving from exceeding the thresholds is envisaged;
- for significant investments in CET1 instruments and DTAs, on the other hand, the following is envisaged:
 - an initial threshold for deductions, calculated as 10% of CET1 prior to deductions deriving from exceeding the thresholds, adjusted to take into account any excess over the threshold described in the previous point;
 - a further threshold is indicated, calculated on 17.65% of Common Equity (calculated in the same way as the point above, minus the DTAs that are dependent on future profitability and arise from temporary differences and significant investments in CET1 instruments issued by financial sector entities), to be applied in aggregate on amounts not deducted using the first threshold.

All amounts not deducted must be weighted among risk-weighted assets at 250%.

Capital requirements

Qualitative and quantitative disclosure

According to the regulations for the prudential supervision of banks (Bank of Italy Circular 285 of 17 December 2013 and subsequent amendments), which adopt the provisions on capital measurement and capital ratios (Basel 3), the Banking Group's total own funds must amount to at least 13.08% of total risk-weighted assets (total capital ratio including the minimum requirement for Pillar 1, the additional Pillar 2 requirement of 1.79%, the capital conservation buffer of 2.5% on a fully-loaded basis already from 2019, the additional O-SII Buffer (Other Systemically Important Institutions Buffer) of 0.75% on a fully-loaded basis from 2021, and the institution-specific countercyclical capital buffer of 0.04% in the first quarter of 2022) arising from the risks typically associated with banking and financial activity (credit, counterparty, market and operational risk), weighted according to the regulatory segmentation of borrowers and considering credit risk mitigation techniques and the decrease in operational risks as a result of insurance coverage. The competent authorities, as part of the Supervisory Review and Evaluation Process (SREP), may require higher capital requirements compared to those resulting from the application of the regulatory provisions.

As already illustrated in the Section on "Own Funds", the total regulatory capital is made up of the algebraic sum of the elements specified below:

- Tier 1 Capital (capable of absorbing losses under going concern conditions). This capital is divided into Common Equity Tier 1 Capital and Additional Tier 1 Capital;
- Tier 2 Capital (capable of absorbing losses in the event of a crisis).

The elements indicated above are subject to the following limits:

- Common Equity Tier 1 must at all times be equal to at least 4.5% of risk-weighted assets;
- Tier 1 Capital must at all times be equal to at least 6% of risk-weighted assets;
- Own Funds (i.e. the total regulatory capital), equal to Tier 1 plus Tier 2 Capital, must at all times be equal to at least 8.0% of risk-weighted assets.

Following the Supervisory Review and Evaluation Process (SREP), the ECB annually makes a final decision on the capital requirement that Intesa Sanpaolo must comply with at consolidated level.

On 3 February 2022, Intesa Sanpaolo announced that it had received notification of the ECB's final decision concerning the capital requirement that the Bank has to meet, on a consolidated basis, as of 1 March 2022, following the results of the Supervisory Review and Evaluation Process (SREP). The overall requirement to be met in terms of Common Equity Tier 1 ratio is currently 8.86%.

This is the result of:

- the SREP requirement in terms of Total Capital ratio of 9.79% comprising a minimum Pillar 1 capital requirement of 8%, of which 4.5% is CET1, and an additional Pillar 2 capital requirement of 1.79%, of which 1.01% is CET1 applying the regulatory amendment introduced by the ECB and effective from 12 March 2020¹;
- additional requirements, entirely in terms of Common Equity Tier 1 ratio, relating to:
 - a Capital Conservation Buffer of 2.5%,
 - an O-SII Buffer (Other Systemically Important Institutions Buffer) of 0.75%,
 - a Countercyclical Capital Buffer of 0.10%².

There were no changes in the scope of application of the internal models for credit, counterparty and operational risks compared to 31 December 2021.

The annual Internal Capital Adequacy Assessment Process (ICAAP) Report, based on the extensive use of internal approaches for the measurement of risk, internal capital and total capital available, was approved and sent to the ECB in April 2022.

¹ The regulatory change establishes that the capital instruments not qualifying as Common Equity Tier 1 may be partially used to meet the Pillar 2 requirement.

² Countercyclical Capital Buffer calculated taking into account the exposure as at 31 March 2022 in the various countries where the Group has a presence, as well as the respective requirements set by the competent national authorities and relating to 2023, where available, or the most recent update of the reference period (requirement was set at zero per cent in Italy for H1 2022).

24	Amounts below the thresholds for deduction (subject to 250% risk weight) (**)	10,412	10,285	833
29	TOTAL	330,514	326,903	26,441

(*) Memo item: deducted securitisations equivalent to 1,216 million euro of RWEAs and 97 million euro of requirement.

(**) The amount is shown for information purposes only, as these exposures are already included in row 1 (Credit risk) and related "of which".

The total amount of risk-weighted exposures recorded as at 31 March 2022 was 330.5 billion euro, a change of approximately +3.6 billion euro compared to December 2021. In particular, please note the following:

- on credit risk (+0.7 billion euro compared to the previous quarter, excluding counterparty risk and including the amount below the thresholds for deduction), the increase in the IRB portfolios recognised was mainly attributable to the increase in risk of Russian counterparties, partially offset by the reduction in equity instruments linked to the insurance subsidiaries as a result of the distribution of dividends;
- for counterparty risk (-0.4 billion euro compared to the previous quarter), the decrease was due to a reduction in derivatives exposures, mainly linked to market movements on EUR and USD interest rates;
- as regards securitisation exposures in the non-trading book (+0.7 billion euro compared to the previous quarter), the increase was partially attributable to the finalisation of a new synthetic own securitisation (also offset by a reduction in RWA on credit risk);
- on market risk (+2.6 billion euro compared to the previous year), the increase was mainly attributable to the introduction of the new EBA Guidelines on foreign exchange risk, in force from 1 January 2022;
- for operational risk, in line with the half-yearly update of the calculation, there was no change.

With regard to the RWEA changes with the IRB, IMM and IMA approaches, see the qualitative comments at the bottom of the RWEA flow statements below (EU CR8, EU CCR7 and EU MR2-B).

Key metrics template (EU KM1 Reg. 2021/637)

In accordance with the requirements of Article 447 CRR II (Disclosure of key metrics), the table below reports the key capital and risk measures for the Intesa Sanpaolo Group.

EU 16a	Cash outflows - Total weighted value	113,752	114,097	114,105	112,702
EU 16b	Cash inflows - Total weighted value	24,751	25,491	24,512	23,605
16	Total net cash outflows (adjusted value)	89,001	88,606	89,593	89,097
17	Liquidity coverage ratio (%)	191.1%	184.5%	179.5%	173.9%
Net Stable Funding Ratio					
18	Total available stable funding	614,602	628,694	626,529	626,257
19	Total required stable funding	479,155	493,679	505,925	505,948
20	NSFR ratio (%)	128.3%	127.3%	123.8%	123.8%

With regard to the above table, see the comments at the bottom of the table EU OV1 (in this section) for more details on the change in risk-weighted exposure and the section on Own Funds for more details on the movements in those funds.

**RWEA flow statements of credit risk exposures under the IRB approach in the first quarter
(EU CR8 Reg. 2021/637)**

		(millions of euro)
		Risk weighted exposure amount
1	Risk weighted exposure amount as at 31 December 2021	185,409
2	Asset size (+/-)	2,393
3	Asset quality (+/-)	3,418
4	Model updates (+/-)	-
5	Methodology and policy (+/-)	-
6	Acquisitions and disposals (+/-)	-
7	Foreign exchange movements (+/-)	367
8	Other (+/-)	-4,389
9	Risk weighted exposure amount as at 31 March 2022 (*)	187,198

(*) As at 31 March 2022, the RWEA amount relating to IRB models was 187,198 million euro and was attributable to the Foundation IRB approach for 1,300 million euro (Row 3 EU OV1), to the slotting criteria for 1,046 million euro (Row 4 EU OV1), Advanced IRB approach for 151,374 million euro (Row 5 EU OV1), to equity instruments measured using the simple risk weight approach for 27,910 million euro (Row 4a EU OV1), to amounts below the deduction thresholds for 1,859 million euro (of which Row 24 EU OV1), and to capital instruments measured at PD/LGD for 3,709 million euro.

As at March 2022, the aggregate of the RWAs relating to the exposures subject to credit risk measured using advanced approaches³ amounted to 187,198 million euro, a net increase of 1,789 million euro on December 2021, when the aggregate amounted to 185,409 million euro. The change during the quarter was attributable to the following:

- +2,393 million euro due to an increase in transaction volumes, mainly in the Corporate, Banks and Public Entities portfolios;
- +3,418 million euro due to the deterioration of the credit quality of exposures to counterparties involved in the crisis triggered by the Russia-Ukraine conflict, in the Corporate and Banks portfolios, partially offset by an improvement in the risk profiles of other counterparties in the same portfolios;
- +367 million euro due to changes in foreign currency exposures, reflecting exchange rate fluctuations, driven in particular by the EUR/USD and EUR/AUS appreciation;
- -4,389 million euro for other effects recognised at consolidated level, primarily attributable to changes in insurance investments, resulting from the reduction in reserves and the recognition of profits earned during the quarter.

³ The risk-weighted exposures have been calculated in accordance with the instructions of the CRR, Part Three, Title II, Chapter 3, and the capital requirement has been calculated in accordance with Article 92(3)(a).

RWEA flow statements of CCR exposures under the IMM in the first quarter (EU CCR7 Reg. 2021/637)

(millions of euro)

	RWEA amounts
1 RWEAs as at 31 December 2021	4,430
2 Asset size	-493
3 Credit quality of counterparties	-211
4 Model updates (IMM only)	-
5 Methodology and policy (IMM only)	-
6 Acquisitions and disposals	-
7 Foreign exchange movements	4
8 Other	-
9 RWEAs as at 31 March 2022	3,730

As required by Reg. 2021/637, the table does not include exposures to central counterparties (CCPs). Starting from June 2021 the amount reported in the above table takes into account this exclusion.

With regard to the changes in RWAs related to CCR exposures (derivatives and SFTs, determined based on the IMM, in accordance with part three, title II, chapter 6 of the CRR) the value of the aggregate decreased in the quarter: 4,430 million euro at the end of December 2021 and 3,730 million euro at the end of March 2022. The decrease of 700 million euro was mainly attributable to the following components:

- -493 million euro to the decrease in exposures in the portfolio, mainly in the Corporate portfolio, due to the increase in EUR and USD interest rates;
- -211 million euro due to the improvement in the credit rating of several counterparties in the portfolio;
- +4 million euro due to foreign currency exposures, as a result of exchange rate fluctuations.

RWEA flow statements of market risk exposures under the IMA in the first quarter (EU MR2-B Reg. 2021/637)

(millions of euro)

	VaR	SVaR	IRC	Comprehensive risk measure	Other	Total RWEAs	Total own funds requirements
1 RWEAs as at 31 December 2021	1,563	7,263	2,147	-	215	11,188	895
1a Regulatory adjustment	1,065	4,695	897	-	19	6,676	534
1b RWEAs at the previous quarter-end (end of the day)	498	2,568	1,250	-	196	4,512	361
2 Movement in risk levels	-80	-295	630	-	21	276	22
3 Model updates/changes	-	-	-	-	-	-	-
4 Methodology and policy	-	-	-	-	-	-	-
5 Acquisitions and disposals	-	-	-	-	-	-	-
6 Foreign exchange movements	-	-	-	-	-	-	-
7 Other	-	-	-	-	-	-	-
8a RWEAs at the end of the disclosure period (end of the day)	418	2,273	1,880	-	217	4,788	383
8b Regulatory adjustment	1,100	5,449	-	-	4	6,553	524
8 RWEAs as at 31 March 2022	1,518	7,722	1,880	-	221	11,341	907

The RWEA for the first quarter are in line with December 2021. While the VaR remained stable, the portfolio turnover on credit indices and Italian government driven the impact on the Stressed VaR and Incremental Risk Charge metrics. The Stressed VaR rose due to the overall increase in positions on credit indices; the IRC metric benefited from a decreased exposure to Italian government securities.

Institution-specific Countercyclical Capital Buffer

Below is the information relating to the “Countercyclical capital buffer”, prepared based on the ratios applicable at 31 March 2022 and Implementing Regulation (EU) 2021/637 of the Commission of 15 March 2021 (repealing Delegated Regulation (EU) 2015/1555) which supplements regulation (EU) 575/2013 of the European Parliament and of the Council (CRR) with regard to regulatory technical standards for the disclosure of information in relation to the compliance of institutions with the requirement for a countercyclical capital buffer in accordance with Article 440 of the same CRR. As established by Article 140, paragraph 1, of directive 2013/36/EU (so-called CRD IV), the institution-specific countercyclical capital buffer is the weighted average of the countercyclical ratios which are applied in the countries where the relevant credit exposures of the institutions are located.

CRD IV established the obligation for the designated national authorities to activate an operational framework for the definition of the ratio of the countercyclical capital buffer (CCyB) starting from 1 January 2016. The ratio is subject to review on a quarterly basis. The European regulation was implemented in Italy with Bank of Italy circular 285, which contains suitable regulations concerning CCyB. Based on the analysis of the reference indicators, the Bank of Italy decided to set the countercyclical buffer rate (for exposures towards Italian counterparties) at 0% also for the second quarter of 2022.

The relevant credit exposures include all the classes of exposure other than those under Article 112, letters from a) to f), of Regulation (EU) 575/2013. The following portfolios are excluded: exposures to central administrations or central banks; exposures to regional administrations or local authorities; exposures to public-sector entities; exposures to multilateral development banks; exposures to international organisations; exposures to institutions.

As at 31 March 2022:

- the countercyclical capital ratios at individual country level were set, with the methods summarised above, generally equal to 0%, with the exception of the following countries: Slovakia (1.00%), Hong Kong (1.00%), Norway (1.00%), Czech Republic (0.50%), Bulgaria (0.50%) and Luxembourg (0.50%) and were therefore unchanged from 31 December 2021;
- at consolidated level, Intesa Sanpaolo’s specific countercyclical ratio amounts to 0.04%.

Amount of the Institution-specific countercyclical capital buffer as at 31 March 2022 (EU CCyB2 Reg. 2021/637)

(millions of euro)

Total risk exposure amount	330,514
Institution specific countercyclical capital buffer rate	0.04%
Institution specific countercyclical capital buffer requirement	132

Comparison of own funds, capital ratios and leverage ratio with and without the application of transitional provisions for IFRS 9 (EU IFRS 9-FL LG EBA 2020/12)

		(millions of euro)

14	Total capital (as a percentage of the risk exposure amount) if IFRS 9 or analogous ECLs transitional arrangements had not been applied	18.5%	18.9%	18.8%	19.4%	19.3%
Leverage ratio						
15	Leverage ratio total exposure measure	825,225	805,561	792,111	805,410	786,344
16	Leverage ratio	6.4%	6.6%	6.7%	6.9%	7.2%
17	Leverage ratio if IFRS 9 or analogous ECLs transitional arrangements had not been applied	6.3%	6.5%	6.5%	6.7%	7.0%

As described in the chapter "Own Funds", the first-time adoption of IFRS 9 and the adoption of the "static" approach during the transition period (2018-2022), as permitted by Regulation (EU) 2017/2395, resulted in the effects on regulatory capital and prudential ratios as at 31 March 2022 (with and without applying the transitional provisions for IFRS 9) shown in the table above due to the following:

- the reduction in CET1, due to the first-time adoption of IFRS 9 (FTA), after eliminating the shortfall existing as at 31 December 2017 on IRB exposures;
- the increase in CET1 due to the re-inclusion of the gradually decreasing transitional component as a result of the adoption of the adjustment introduced by the afore-mentioned Regulation, aimed at mitigating the impact of FTA;
- a positive impact on CET1 resulting from the change in the classification of the financial assets in the categories established by IFRS 9 and the consequent change in measurement metrics;
- a reduction in the CET1 ratio as a result of the increase in DTAs that rely on future profitability limited to the complementary portion of the phase-in percentages envisaged for the transitional period, as established by the related EBA Q&As (2018_3784 and 2018_4113);
- the increase in the excess reserve, based on the provisions of the aforementioned Regulation, which may be added to the Tier 2 Capital, up to the amount of 0.6% of IRB RWA, solely for the part in excess of the amount re-included in CET1 as a result of the adoption of said transitional adjustment;
- the reduction of the risk-weighted assets (RWA) on standard exposures which, as a result of the increase in the provisions linked to the first-time adoption of IFRS 9, reduced the risk exposure (EAD);
- the increase in risk-weighted assets (RWA) on standard exposures due to the application, under said provisions, of the scaling factor set out in Regulation (EU) 2017/2395.

From 30 September 2019, the deduction of DTAs and investments in companies in the financial sector described in the section on Own Funds ceased to be applied following the application of the Danish Compromise. As a consequence, the difference between the amount of the 250% risk-weighted DTAs in the IFRS 9 transitional approach and those re-determined on the assumption IFRS 9 had not been applied (fully-loaded IFRS 9), as described in detail in the above-mentioned section, results in an increase in risk-weighted exposures for the latter, which will cease at the end of the transitional period (2022).

Liquidity risk

LIQUIDITY RISK

The Group's liquidity position – supported by suitable high-quality liquid assets (HQLA) and the significant contribution from stable customer deposits – remained within the risk limits set out in the current Group Liquidity Policy in the first three months of 2022. Both regulatory indicators, LCR and NSFR, were above the minimum regulatory requirements.

Over the last 12 months, the Liquidity Coverage Ratio (LCR) of the Intesa Sanpaolo Group, measured according to Delegated Regulation (EU) 2015/61, has amounted to an average of 191.1%.

The table below contains the quantitative information on the Liquidity Coverage Ratio (LCR) of the Intesa Sanpaolo Group, measured in accordance with the EU regulations and subject to periodic reporting to the competent Supervisory Authority. The figures shown refer to the simple quarterly average of the last 12 months of monthly observations, in accordance with Regulation 2021/637.

EU20c	Inflows subject to 75% cap	66,219	64,593	63,176	63,450	24,751	25,491	24,512	23,605
TOTAL ADJUSTED VALUE									
EU21	LIQUIDITY BUFFER					169,964	163,182	160,318	154,832
22	TOTAL NET CASH OUTFLOWS					89,001	88,606	89,593	89,097
23	LIQUIDITY COVERAGE RATIO					191.1%	184.5%	179.5%	173.9%

(a) Liquidity reserves held by subsidiaries based in a third country subject to restrictions to assets transferability are recognised only for the portion intended to cover net cash outflows in that third country. All excess amounts are therefore excluded from the Group's consolidated LCR.

At the end of March 2022, the exact value of unencumbered HQLA reserves at the various Treasury Departments of the Group totalled 184 billion euro (187 billion euro as at December 2021), over 70% of which consisted of cash as a result of temporary excess liquidity payments in the form of unrestricted deposits held at central banks. Including the other marketable

reserves and/or eligible Central Bank reserves, including retained self-securitisations, the Group's unencumbered liquidity reserves amounted to 189 billion euro (192 billion euro in December 2021).

	(millions of euro)	
	Unencumbered (net of haircut)	
	31.03.2022	31.12.2021
HQLA Liquidity Reserves	184,290	187,066
Cash and Deposits held with Central Banks (HQLA)	134,910	135,061
Highly liquid securities (HQLA)	49,380	52,005
Other eligible and/or marketable reserves	5,116	5,306
Total Group's Liquidity Buffer	189,406	192,372

At 31 March 2022, the Intesa Sanpaolo Group's NSFR, supported by a solid base of stable deposits from customers, adequate wholesale medium/long-term securities funding and the TLTRO funding from the ECB, was 128.3%. This indicator remains significantly higher than 100%, even excluding the positive contribution from TLTRO funding.

The stress tests, in view of the high availability of unencumbered liquidity reserves, yielded results in excess of the maximum threshold for the Intesa Sanpaolo Group, with a liquidity surplus capable of meeting extraordinary cash outflows for a period longer than 3 months. Adequate and timely information regarding the development of market conditions and the position of the Bank and/or Group was regularly provided to the corporate bodies and internal committees in order to ensure full awareness and manageability of the main risk factors. All the necessary preventive management and control measures implemented from the outset of the COVID-19 emergency remain in place to detect any signs of potential exacerbation of liquidity conditions.

Leverage Ratio

Qualitative and quantitative disclosure

Under the Basel 3 prudential regulations, the Leverage ratio entered definitively into effect on 1 January 2015. The Leverage ratio measures the degree to which Tier 1 Capital covers the Banking Group's total exposure. The ratio is calculated by considering off-balance sheet exposures and assets.

The objective of the indicator is to contain the degree of indebtedness on banks' accounts by establishing a minimum level of coverage of exposures with equity. The ratio, which is monitored by the authorities, is expressed as a percentage and is subject to a minimum threshold of 3%. From June 2021, this limit became a Pillar 1 requirement under the provisions of Article 92(1)(d) of Regulation (EU) 2019/876 (CRR II).

The Leverage ratio is calculated quarterly. The indicator is monitored at both the individual and Banking Group level.

The Leverage ratio is calculated as the ratio of Tier 1 Capital to total exposure. The total exposure includes the on-balance sheet exposures, net of deductions and offsetting allowed by the regulations, and the off-balance sheet exposures.

As a result of the continuation of the exceptional circumstances resulting from the COVID-19 pandemic, the European Central Bank issued Decision (EU) 2021/1074 allowing the possibility of temporarily excluding (until 31 March 2022) certain exposures to central banks from the total exposures.

The Intesa Sanpaolo Group has decided to continue to make use of these exclusions and is therefore required to comply with a higher regulatory minimum limit of 3.09%, determined in accordance with the provisions of Article 429a(7) (the adjusted Leverage Ratio - aLR).

Leverage ratio of the Intesa Sanpaolo Group

The disclosure of the leverage ratio of the Intesa Sanpaolo Group as at 31 March 2022, provided in accordance with the regulatory principles of the CRR amended by Regulation 2019/876 (CRR II), is presented below.

The quantitative disclosure required by the above-mentioned Regulation 2021/637, applicable from June 2021, is published half-yearly, in accordance with the regulatory requirement for large institutions. In the interest of completeness, a summary quantitative disclosure of the leverage ratio is provided below. For continuity with the annual reporting, the ratio calculated excluding the impact of the temporary exclusion of several exposures to central banks (equal to 121.3 billion euro as at 31 March 2022) is shown.

The Leverage ratio is indicated according to the transitional provisions.

	(millions of euro)	
Capital and total exposure measure	31.03.2022	31.12.2021
Tier 1 capital	52,877	53,511
Leverage ratio total exposure measure	825,225	805,561
Leverage ratio	6.41%	6.64%
Leverage ratio (excluding the impact of any applicable temporary exemption of central bank reserves)	5.59%	5.76%

Declaration of the Manager responsible for preparing the Company's financial reports

The Manager responsible for preparing the Company's financial reports, Fabrizio Dabbene, declares, pursuant to par. 2 of art. 154-bis of the Consolidated Law on Finance, that the accounting information contained in this document "Basel 3 - Pillar 3 as at 31 March 2022" corresponds to the corporate records, books and accounts.

Milan, 6 May 2022

10	Accounting classification	Shareholders' equity
11	Original date of issuance	30/03/2022
12	Perpetual or dated	Perpetual
13	Original maturity date	No maturity
14	Issuer call subject to prior supervisory approval	Yes
15	Optional call date, contingent call dates and redemption amount	30/09/2028
16	Subsequent call dates, if applicable	Early redemption exercisable on each interest payment date starting from 30/09/2028 and thereafter on each interest payment date
	COUPONS / DIVIDENDS	
17	Fixed or floating dividend/coupon	Fixed
18	Coupon rate and any related index	6.375% per annum, payable semi-annually (up to the first call date)
19	Existence of a dividend stopper	No
EU 20a	Fully discretionary, partially discretionary or mandatory (in terms of timing)	Fully discretionary
EU 20b	Fully discretionary, partially discretionary or mandatory (in terms of amount)	Fully discretionary
21	Existence of step up or other incentive to redeem	N/A
22	Noncumulative or cumulative	Noncumulative
23	Convertible or non-convertible	Non-convertible
24	If convertible, conversion trigger(s)	N/A
25	If convertible, fully or partially	N/A
26	If convertible, conversion rate	N/A
27	If convertible, mandatory or optional conversion	N/A
28	If convertible, specify instrument type convertible into	N/A
29	If convertible, specify issuer of instrument it converts into	N/A
30	Write-down features	Yes
31	If write-down, write-down trigger(s)	Write-down of nominal capital if CET1 of Intesa Sanpaolo or Intesa Sanpaolo Group is below 5.125 pct.
32	If write-down, full or partial	Full or partial
33	If write-down, permanent or temporary	Temporary
34	If temporary write-down, description of write-up mechanism	If CET1 of ISP or the Group returns to 5.125 pct or above, the issuer may decide to reevaluate the Nominal Capital within the limits of the Maximum Distributable Amount.
34a	Type of subordination (only for eligible liabilities)	N/A
EU 34b	Ranking of the instrument in normal insolvency proceedings	N/A
35	Position in subordination hierarchy in liquidation (specify instrument type immediately senior to instrument)	Senior to Equity and subordinate to instruments having a lower subordination level (i.e. T2)
36	Non-compliant transitioned features	N/A
37	If yes, specify non-compliant features	N/A
37a	Link to the full term and conditions of the instrument (signposting)	https://group.intesasnpaolo.com/it/investor-relations/prospetti/emissioni-internazionali/durata-perpetua

GALLERIE D'ITALIA. FOUR MUSEUMS, A NATIONWIDE CULTURAL NETWORK.

Gallerie d'Italia enables Intesa Sanpaolo to share its artistic and architectural heritage with the general public: the art collections of the Bank, ranging from archaeological artefacts to contemporary works of art, are housed in historic buildings located in four cities, in a unique network of museums.

Gallerie d'Italia - Piazza Scala in Milan hosts, in a highly prestigious architectural setting, a selection of two hundred masterpieces of the nineteenth century in Lombardy, that are part of art collections of Fondazione Cariplo and Intesa Sanpaolo, and an exhibition dedicated to twentieth century Italian art.

Gallerie d'Italia - Palazzo Leoni Montanari, Vicenza is home to art of the region Veneto from the 1700s as well as pottery from Attica and Magna Graecia. It also holds one of the most important collections of Russian icons in the West.

Gallerie d'Italia - Palazzo Zevallos Stigliano, Naples hosts the Martyrdom of Saint Ursula, the last known painting by Caravaggio, alongside more than 120 examples of Neapolitan art dating from the early 17th to the early 20th century. New premises within the majestic building which was formerly the Bank of Naples in Via Toledo mean that the museum space is tripled in size, increasing exhibition opportunities.

There is also the newly-open fourth location of **Gallerie d'Italia in Piazza San Carlo in Turin**, a site which is mainly dedicated to photography and the digital world.

Gallerie d'Italia -
Palazzo Zevallos Stigliano, Naples

A View of the Piazza Navona in Rome is a work by Gaspar van Wittel. A Dutch painter who relocated to Italy, he is considered the forerunner of modern vedutism, as a result of the almost topographic precision of the scene.

The painting belongs to a series of nine landscapes that van Wittel dedicated to Piazza Navona between 1688 and 1721, the largest square in Rome after St. Peter's Square, and undoubtedly the most picturesque thanks to its market and countless related activities. The piazza, a "grand example of theatrical Baroque" was blessed in the mid-seventeenth century with an architectural renovation that gave it a reputation as one of the most beautiful squares in Rome, famous for the magnificence of its buildings and fountains. The view is from the first floor of Palazzo Lancelotti; on the left, the light highlights a series of buildings including the Church of Sant'Agnese in Agone which was rebuilt under the guidance of Francesco Borromini. On the right, in the shadows and strongly shortened, it is possible to see the sixteenth century façade of San Giacomo degli Spagnoli; the roof terrace of Palazzo Altamps stands out against the background, while in the centre there is the *Fontana dei Fiumi* by Gian Lorenzo Bernini and the sixteenth-century fountains known as *del Moro* and *dei Calderari*.

The painting excels for its splendid colours and the clarity of its lines and volumes. The sky is intensely bright with a hue of light blue that is characteristic of the Dutch artist's best works.

The work is part of the art collections on permanent display in Gallerie d'Italia of Intesa Sanpaolo in Naples. The collection traces the most important moments of art in Naples and Campania from the early seventeenth century up to the first decades of the twentieth century, from Caravaggio and the naturalist turning point which took place with the artist's arrival in the city in 1606, right up to the works by Vincenzo Gemito, through the pomp and splendour of the Spanish viceroyalty and the Bourbon era.
