

Setweb

SetWeb is the sophisticated Internet based solution, developed in order to provide our institutional customers with a wide range of real time inquiries facilities on their securities and cash accounts.

On the top of the powerful information functions on balances, movements, corporate events, income, real time status of settlement transactions, SetWeb also provides for instruction facilities (securities settlement, cash payments).

SetWeb allows the proper tailoring of users' profiles: inquiries only, full access with information and instruction functions.

A powerful, user friendly value added tool, SetWeb is extensively used by our customers with special reference to the transactions' status real time monitoring, speeding up the inquiries on the accounts and enhancing the communication flows.
