

Italian Market: 2Q18 Results

A Post-2Q Results Season Quick Overview

We judge the 2Q18 reporting season in Italy as in line with our expectations: based on our 2Q18 previews, we calculated that, out of the 77 companies in our sample, 40% of results came in above expectations, 48% in line, and 12% below our forecasts; the outcome is broadly in line with 1Q18 data. Lights and shadows for Financials: solid asset gatherers and mixed Banks and Insurers. Non-Financials were in line, with sound orders intake, price/mix and efficiency gains offsetting FX and raw materials headwinds, with a slowdown in selected regions.

- **2Q18 results: Financials in line.** 2Q18 results marked a partial halt to the improvement trend recorded in the previous quarters among Financials: out of the 17 companies in our sample (asset gatherers, banks and insurance), 8 reported above, 7 in line, and 2 below our estimates. The season was positive overall for Asset Gatherers, on higher performance fees and lower operating costs. It was a mixed quarter for Banks, supported by generally lower CoR, stable core revenues (with some exceptions), while the capital base was impacted by sovereign spread widening. Lights and shadows among Insurance, on solid non-life technical profitability, while the life business weighed on Generali.
- **2Q18 results: Non-Financials in line.** Out of the 60 companies in our 2Q18 preview sample or Non-Financials (Consumers, Industrials, Energy & Utilities and TMT), 38% reported above, 50% in line and 12% below our estimates. We view non-Financials overall in line, as has been the case in the past three quarters. We had several positive surprises among Industrial G&S, driven by sound orders intake, more than offsetting negative FX and raw materials; the quarter was also sound for Oil & Gas and Utilities. Auto and Consumer G&S were mixed, with price/mix and efficiency gains, balancing a slowdown in demand in selected areas, and raw material costs and FX. The picture was subdued for Branded Goods (softer trading conditions in Europe and negative FX) with some exceptions, and for Construction. TMT were overall in line.
- **Outlook.** We tracked 38 companies' announcements on FY18 guidance: most of them (22 companies) confirmed their FY guidance, while 11 companies raised their guidance and 5 revised it downwards. From this angle, the 2Q18 reporting season was encouraging and earnings visibility for the FY18 remains unchanged. Looking ahead at the 3Q18 earnings season, among non-Financials we expect FX and raw materials headwinds to smooth out, also for a base effect, while internal demand in the euro area seems to be levelling off. As for Financials, we expect higher financial markets volatility reflecting into operating results and capital base (sovereign spread widening), while lower CoR might provide support for Banks.

Sector Reviews

Financials

In **Asset Gatherers**, Anima Holding was in line, weighed down by one-off institutional outflow, and pointed to a higher contribution from the retail segment. Azimut Holding beat our forecast, thanks to higher performance fees and lower distribution costs, and a positive impact from new accounting rules. Banca Generali's net profit was above, driven by higher banking and entry fees, and better operating costs; net inflows' guidance was raised. Banca Mediolanum's net profit was above, driven by better net interest income and lower operating costs and provisions; guidance was confirmed. Finecobank's op. result was in line, thanks to better operating costs, with total net revenues in line and net income benefitting from IFRS9.

In **Banks**, Banco BPM's net profit was below, due to weak commission income, lower NII and higher LLP; capital base was weighed down by sovereign spread widening. Banca IFIS was in line, penalised by higher LLP, due to one-offs in the enterprise business; guidance was revised down. Banca MPS' gross op. income was in line, on higher core revenues (NII) and lower operating costs offset by negative trading income, while CoR was lower than expected. Credem reported in line, as slightly lower than expected revenues were offset by moderately lower operating costs and cost of risk. Creval's net income was above, backed by non-recurring items, on flat core revenues and LLP below our expectations; guidance was confirmed. Mediobanca's net income was above, backed by higher trading income and lower LLP, while core revenues were in line; CoR guidance was improved. UBI reported in line, mainly backed by rising NII, while the negative impact from sovereign spreads was partially mitigated by internal capital generation. Unicredit's net income was broadly in line, driven by solid NII and lower LLP, offset by higher provisions for risk and charges; capital was negatively impacted by the BTP spread widening; FY18 and FY19 targets were confirmed, while improving NII and CoR guidance.

Among **Insurers**, Cattolica's pre-tax profit was above, on good non-life technical profitability, and higher than expected gross premiums. Generali's op. result was below, weighed down by life and other businesses, while non-life reported an improving combined ratio, and net income benefitted from one-off capital gains. UnipolSai's net income was above, driven by non-life (thanks to better than expected technical performance), real estate and other businesses. Unipol's pre-tax was above, driven by non-life, holding and other, with the life business in line and banking business slightly below.

Consumer

In **Branded Goods**, Luxottica's EBIT was slightly below, on softer wholesale trading conditions in Europe, while North America and Asia-Pacific reported strong performances; guidance was confirmed. Safilo Group was below, weighed down by negative FX and sales mix, with unfavourable weather conditions not fully offset by higher efficiency gains; guidance was trimmed down. Brunello Cucinelli's sales were in line, with China and RoW accelerating, while Italy and US (impacted by negative FX) were in line. Geox's EBITDA was slightly below, mostly due to higher A&P, while sales were in line, affected by lower discounted sales and a delayed start to the spring season. Moncler was above, on strong retail (despite FX) and, geographically, driven by Americas and Asia & RoW performance. Prada's gross profit was in line, with strong Ifl sales, and reduced mark-downs offsetting negative FX. S. Ferragamo's EBITDA was in line, with the Wholesale channel still negatively impacted by US department stores sales, while the gross margin dilution was slightly better than expected. Tod's EBITDA was above, driven by the wholesale segment, Hogan brand and China, plus efficiency actions.

In **Consumer Goods & Services**, Autogrill's underlying EBITDA was in line, weighed down by FX headwinds, wage inflation and one-offs costs denting North America profitability; mid-term guidance was confirmed. Davide Campari's EBIT pre one-offs was slightly above, driven by a strong LFL acceleration, and lower SG&A. De' Longhi's adj. EBITDA was in line, with strong coffee machines and a stabilisation of Kenwood's kitchen machines offsetting strong raw material and FX headwinds; top-line guidance was raised. Gamenet was in line, backed by Betting & Online segment, reflecting the very favourable pay-out. Massimo Zanetti's adj. EBITDA was slightly above, underpinned by better sales and channel mix, opex containment and its ability to continue to lower raw material prices.

Industrials

Among **Autos**, FCA's adj. EBIT missed our forecast, mainly due to sharp slowdown in APAC regions and at Maserati, coupled with higher launch costs for new models in NAFTA; FY guidance was revised downwards. Ferrari's net profit beat our forecast, sustained by volumes, ongoing positive mix, higher sponsorships and an improved championship ranking; guidance was confirmed. Brembo was broadly in line, on strong car division, despite FX headwinds and ramp-up costs; guidance was confirmed. Piaggio was in line, on solid volumes growth, and better net debt, thanks to WC generation; guidance was confirmed. Pirelli's adj. EBITDA was slightly above, thanks to price/mix and efficiency gains, which more than offset higher raw material costs and negative FX; guidance confirmed. Sogefi reported below, on negative FX and raw materials, and weaker performance in Europe, due to slowdown in AM.

In **Construction**, Buzzi Unicem's rec. EBITDA was below, penalised by significant decline in US (higher production and distribution costs) and by weak Ukrainian market; guidance was reduced. Salini's EBITDA was below, weighed by FX headwinds and slow advancement of some projects in Italy and Ethiopia.

Among **Industrials Goods & Services**, CNH Industrial beat our forecasts, mainly due to stronger AG trend reflecting strong end-users demand; guidance was raised. ENAV was in line, backed by growth in En-route service, and lower opex; guidance confirmed. Fincantieri's EBITDA was slightly above, supported by shipbuilding division, while Offshore remained below; guidance confirmed. IMA's EBITDA was slightly above, driven by strong contribution from all businesses (Tobacco, in particular); guidance was raised. Interpump's EBITDA was in line, driven by Hydraulic and Water Jetting, with selling price hikes more than offsetting higher raw materials. Leonardo beat our forecast, underpinned by better trend in helicopters and DRS, while net debt also was ahead of forecast; orders intake guidance was raised. Poste Italiane was above, driven by Insurance Services, and Mail, Parcels & Distribution divisions, while Fin. Services reported in line; guidance confirmed. Tenaris reported in line, on better sales mix and increase in average selling price. Zignago's EBITDA was above, driven by sound consumer demand (F&B and Perfumery), despite FX headwinds.

Pharma/Medical Equipment, Amplifon was in line, benefitting from operating leverage and production efficiencies, despite FX and rising marketing cost; guidance confirmed. Diasorin was in line, weighed by negative FX, legal costs and closure of Irish plant, balancing improved sales mix and production efficiencies; guidance was revised down. Recordati's EBITDA was above, driven by sales mix, commercial efficiencies and consolidation of Metoprolol treatments, more than offsetting increase in R&D expenses; guidance confirmed.

Energy & Utilities/TMT

In **Oil & Gas**, Eni's adj. EBIT was in line, on solid E&P (positive oil price trend and higher production) and G&P (better long-term supply contracts; lower logistic costs; improved power and LNG) partly offset by R&M and Chemicals. Maire Tecnimont's EBITDA was in line, supported by the execution of EPC projects, and a solid performance in the Tech/E&C division; guidance was confirmed. Saipem's adj. EBITDA was above, supported by strong new contracts inflow, efficiency plans and benefits from ongoing re-organisation; guidance was confirmed. Saras' EBITDA was slightly above, reflecting a lower refining performance, partly offset by higher EBITDA from thermal power generation; guidance was reiterated.

In **Utilities**, Atlantia's EBITDA was in line, with strong Italian motorways (traffic mix and volumes effect) offsetting weaker foreign motorways (Brazil), while ADR was backed by healthy Aviation business (traffic acceleration and a better mix). SIAS was in line, driven by higher motorways revenues, backed by a better traffic mix in volumes/tolls. Enel was broadly in line, supported by organic growth in renewables, an improvement in sales margins from in Spain and Romania, lower opex and energy supply costs; guidance was confirmed. ERG's EBITDA was in line, driven by growth in hydro power and perimeter changes (acquisition of ForVEI solar plants), partly offset by weaker wind and thermoelectric; guidance was raised. Italgas was in line, on higher revenues and operational efficiency, resulting in costs reduction, while net income benefitted from a lower tax

rate. Snam was in line, with higher regulated revenues, largely from the transmission business partially offset by lower non-regulated revenues; guidance was raised. Terna's net income was slightly above, on higher revenues (electricity transmission and dispatching, and revenues from Tamini) partially offset by higher opex. A2A beat our forecast, on strong organic growth by Generation and Market business units, while net debt benefitted from positive cash generation. Acea was above, reflecting a positive contribution from all divisions, and raised its EBITDA guidance. Ascopiaeve's net income was above, mainly due to non-recurring effects deriving from the gas settlements, lower D&A and taxes. Hera was in line, on a positive gas sector, benefitting from higher volumes sold, income for sales & trading and waste. Iren was above, driven by Generation and Heating thanks to TEE contribution, and a better contribution from hydro power production.

In **TLC&Media**, Telecom Italia's EBITDA declined, as expected, due to a mix of recurring and non-recurring factors. RCS Mediagroup's net profit was in line, backed by recent editorial initiatives, a better portfolio of sport events and additional efficiencies. Despite no significant change in the underlying top line trend, GEDI's EBITDA was above our estimates mostly thanks to the lack of restructuring provisions booked in 2Q17. In the tower sector, INWIT's EBITDA was in line, with a revenues increase and lower leasing costs more than offsetting incremental costs from new sites and new businesses. EI Towers was in line, with inflation adjustments, a step-up in the Cairo agreement and small M&A more than offsetting lower revenues from MNO's renegotiations. Rai Way was in line, as the inflation impact and a ramp-up of new services to Rai offset the declining third-party revenues (mostly MNOs).

Coverage policy and frequency of research reports

The list of companies covered by the Research Department is available upon request. Intesa Sanpaolo SpA aims to provide continuous coverage of the companies on the list in conjunction with the timing of periodical accounting reports and any exceptional event that affects the issuer's operations. The companies for which Banca IMI acts as sponsor or specialist or other regulated roles are covered in compliance with regulations issued by regulatory bodies with jurisdiction. In the case of a short note, we advise investors to refer to the most recent company report published by Intesa Sanpaolo SpA's Research Department for a full analysis of valuation methodology, earnings assumptions, risks and the historical of recommendation and target price. In the Equity Daily note and the Weekly Preview report the Research Department reconfirms the previously published ratings and target prices on the covered companies (or alternatively such ratings and target prices may be placed Under Review). Research is available on Banca IMI's web site (www.bancaimi.com or www.intesasanpaolo.com) or by contacting your sales representative.

Equity Research Publications in Last 12M

The list of all recommendations on any financial instrument or issuer produced by Intesa Sanpaolo Research Department and distributed during the preceding 12-month period is available on the Intesa Sanpaolo website at the following address:
http://www.group.intesasanpaolo.com/scriptlsir0/si09/studi/eng_archivio_racc_equity.jsp.

Valuation methodology (long-term horizon: 12M)

The Intesa Sanpaolo SpA Equity Research Department values the companies for which it assigns recommendations as follows:

We obtain a fair value using a number of valuation methodologies including: discounted cash flow method (DCF), dividend discount model (DDM), embedded value methodology, return on allocated capital, break-up value, asset-based valuation method, sum-of-the-parts, and multiples-based models (for example PE, P/BV, PCF, EV/Sales, EV/EBITDA, EV/EBIT, etc.). The financial analysts use the above valuation methods alternatively and/or jointly at their discretion. The assigned target price may differ from the fair value, as it also takes into account overall market/sector conditions, corporate/market events, and corporate specifics (i.e. holding discounts) reasonably considered to be possible drivers of the company's share price performance. These factors may also be assessed using the methodologies indicated above.

Equity rating key: (long-term horizon: 12M)

In its recommendations, Intesa Sanpaolo SpA uses an "absolute" rating system, which is not related to market performance and whose key is reported below:

Equity rating key (long-term horizon: 12M)

| Long-term rating | Definition |
|-------------------------|---|
| BUY | If the target price is 20% higher than the market price |
| ADD | If the target price is 10%-20% higher than the market price |
| HOLD | If the target price is 10% below or 10% above the market price |
| REDUCE | If the target price is 10%-20% lower than the market price |
| SELL | If the target price is 20% lower than the market price |
| RATING SUSPENDED | The investment rating and target price for this stock have been suspended as there is not a sufficient fundamental basis for determining an investment rating or target. The previous investment rating and target price, if any, are no longer in effect for this stock. |
| NO RATING | The company is or may be covered by the Research Department but no rating or target price is assigned either voluntarily or to comply with applicable regulations and/or firm policies in certain circumstances, including when Intesa Sanpaolo is acting in an advisory capacity in a merger or strategic transaction involving the company. |
| TARGET PRICE | The market price that the analyst believes the share may reach within a one-year time horizon |
| MARKET PRICE | Closing price on the day before the issue date of the report, as indicated on the first page, except where otherwise indicated |

Valuation methodology (short-term horizon: 3M)

Our short-term investment ideas are based on ongoing special market situations, including among others: spreads between share categories; holding companies vs. subsidiaries; stub; control chain reshuffling; stressed capital situations; potential extraordinary deals (including capital increase/delisting/extraordinary dividends); and preys and predators. Investment ideas are presented either in relative terms (e.g. spread ordinary vs. savings; holding vs. subsidiaries) or in absolute terms (e.g. preys).

The companies to which we assign short-term ratings are under regular coverage by our research analysts and, as such, are subject to fundamental analysis and long-term recommendations. The main differences attain to the time horizon considered (monthly vs. yearly) and definitions (short-term 'long/short' vs. long-term 'buy/sell'). Note that the short-term relative recommendations of these investment ideas may differ from our long-term recommendations. We monitor the monthly performance of our short-term investment ideas and follow them until their closure.
