Climate Change Action Plan (PDF)

In 2017, a multi-annual Environmental Sustainability Plan – Climate Change Action Plan – was prepared with targets for 2022 and 2037, which follows other plans launched since 2009. In the Plan, the Intesa Sanpaolo Group declines CO_2 emission reduction targets, linked to its activities, taking 2012 as the reference year. The following scheme only includes UBI from 2021. The CCAP was replaced by the Own Emissions Plan, but has been reported throughout 2022, the CCAP's first medium-term target.

Group - tCO2eq emissions from Scope 1 (Direct) and Scope 2 (Indirect Market Based). Results compared to the 2008 reference year.

The CCAP targets for 2022 and 2037 (including UBI Banca only from 2021)

* The increase in emissions recorded in 2018 and 2021 is mainly due to a wider reporting perimeter. Banca Popolare di Vicenza and Veneto Banca figures are included from 2018 while UBI Banca Group figures are included from 2021.
