

Project name: Hashknife

Borrower: HASHKNIFE ENERGY CENTER II LLC

Sector: Power Generation

Country: USA

Financial Product: Project Finance

Equator Principles category: B

Project description

The Hashknife Energy Center is a 475-megawatt solar energy and 475-megawatt energy storage project under construction in Navajo County, Arizona.

Summary of Key Environmental Impacts and Risks

The project has been developing in a Designated Country. The Environmental and Social due diligence by the independent consultant assigns a Category B, since while the project has environmental impacts, they are largely contained to the project construction/phase, and the Borrower is required through its authorizations and other permits to implement mitigation measures to reduce the level of significance of these impacts to a relatively low level, and to report on the compliance to regulatory agencies.
