

“Acquisti & Sostenibilità” Day - PAPER Supply Chain

Milan, 13th May 2011 at Intesa Sanpaolo, Palazzo Besana - Piazza Belgioioso 2 Milano

The “Acquisti & Sostenibilità” event aims at spreading more information on the process, life cycle and specifications of Paper and its products.

This initiative intends to increase the level of awareness of the main actors working in the sector, by comparing notes on the life cycle of this product, which is as common as it is useful. It is directed at those people who, within companies and without, work every day to create and offer to the market and to their company increasingly sustainable products; who use this product and wish to improve its use and discover further potential, by contributing to company competitiveness and to the wellbeing of the Community.
